Private Gate Access For Residence

In 2015 the HOA Board of Directors approved the installation of two expensive gate systems at Highlands Plantation. The three main purposes of these gate systems included the following:

Stop Non Owner/ Resident Traffic - Stop non-owner/resident traffic from using HOA roads to cross from Blackjack Road to Highway 82 and vice versa. A tremendous amount of non-resident vehicles use HOA roads daily thus causing HOA road maintenance issues that must be paid for by HOA owners will be eliminated by these two gate systems.

Security – The gate system will offer additional security with camera systems recording who enters and exits including tag numbers of all entrances 24/7/365.

Future Control Of Who Accesses HOA Roads: There are many undeveloped lots, undeveloped tracts of land within Highlands Plantation and large amounts of acreage boarding Highlands Plantation roads. All land and lots will be developed over time and must use Highlands Plantation roads that must be maintained by all HOA owners. The gate system will provide control over who accesses HOA roads and assure that the cost of damage and maintenance issues are shared by all users of HOA roads.
